

WORKSHOPS:

Dark Web

Michigan State Police

As the concern over privacy and security continues, so does the creation of tools and services meant to complement these concerns. The Dark Web was created because of the concern over these issues. This presentation will discuss the Dark Web and how it works.

Active Shooter / Mass Casualty Events - What You Need to Know

Federal Bureau of Investigation

Active shooter / mass casualty events are dramatically on the rise in the US, from Sandy Hook to San Bernardino to Orlando to Las Vegas and Sutherland Springs, Texas. While the motivations and nexus to terrorism in these events sometimes differ, the fact remains that these complex and deadly incidents are becoming more common and, regardless of the circumstances, will always be events that state and local authorities will have to respond to and resolve. As a result of this dynamic, the National Counter Terrorism Center (NCTC) requested partners at the FBI Active Shooter Unit provide their excellent and cutting edge presentation on what state and local first responders can expect when dealing with an active shooter / mass casualty event. This discussion will examine lessons learned from past active shooter event studies and ask hard questions about the state of preparedness across the country. Specific discussion on recommendations to improve preparedness involve formal training for an active shooter event, tactical considerations for first responders, medical supplies and training, IED encounters, Command and Control, Media Relations, Victims Assistance, Training Civilians, and conducting and utilizing Threat assessments.

Identifying the Signs of Human Trafficking in the Healthcare Setting

The Rebecca Bender Institute

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

Human trafficking is a very serious problem in Michigan. The healthcare setting is one venue in which human trafficking victims can find help if the professionals caring for them can recognize the signs presented to them. In this presentation participants will learn the scope of human trafficking in Michigan and how to identify human trafficking victims in a healthcare setting. This presentation combines professional expertise and personal experiences of being trafficked.

Complex Coordinated Terrorist Attacks (CCTA)

Department of Homeland Security

Chemical Facility Anti-Terrorism Standards (CFATS)

Department of Homeland Security

The CFATS presentation will cover the current status of the regulatory program. In the presentation, updates on Chemicals of Interest that have been prevalent in the country and the industries DHS deals with. Statistical information as it applies to the nation and current statistics for the state of Michigan. Various resources available to facilities on questions they may have on the CFATS program.

School Track: Multi-Year Comprehensive School Planning for Active Assailants

Osceola County Emergency Management

This session will provide a method for developing school active assailant preparedness through a multi-year program of planning, training, and exercise activities. It will focus on critical coordination aspects with community partners including emergency management, police, fire, medical, and mental health responders. Practical methods for addressing critical capabilities such as lockdown, run-hide-fight, reunification, and incident command/control will also be discussed.

Cyber Security Risks of Medical Devices

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

This session will discuss the cybersecurity risks of medical devices and what can be done to mitigate those risks.

Emergency Management Assistance Compact

National Emergency Management Agency

The Emergency Management Assistance Compact (EMAC) is the nation's mutual aid system for sending personnel and resources during times of emergency and disaster. This session provides an overview of EMAC history, legal framework, and processes as well as Michigan's 2018-2019 role in coordinating national EMAC efforts.

HVE/Radicalization

Federal Bureau of Investigation

Homegrown Violent Extremism (HVE) indicators and lesson learned.

Food Defense: Preventing Intentional Contamination of the Food Supply

Federal Bureau of Investigation

Because the US food supply chain is a soft target with numerous access points, food is vulnerable to intentional contamination. This session will provide an overview of food defense concepts, examples of intentional contamination incidents, and information about ongoing efforts by the FBI and other agencies to protect the food sector.

Uprising: A City Divided (an interactive case study pertaining to an officer involved shooting resulting in civil unrest)

Public Affairs Science and Technology Fusion Center, National Public Affairs Academy, Risk and Infrastructure Affairs Academy

In the wake of an officer involved shooting, the city of Charlotte (N.C.) was thrust into the national spotlight after the unexpected and unanticipated uprising of civil unrest. The dramatic events of Sept. 20 – 24 left one dead, several injured, hundreds of thousands of dollars in property damage, and a city divided until the release of information exposing the facts and truth of the police investigation were reluctantly released. Mark will tell us the lessons learned from this extraordinary situation that might be critical to other government communicators in the future.

School Track: Understanding Signs and Symptoms of Human Trafficking

Michigan State Police

Since human trafficking is often a crime that is hidden in plain sight, it is important to be aware of its warning signs. This training session will help school personnel recognize signs and potential red flags. Knowing the indicators of human trafficking is a key step in identifying more victims and helping them find the assistance they need.

Dataminr

Federal Bureau of Investigation

Dataminr is a web-based program that monitors Twitter postings real-time for information of interest to its users. Dataminr sends email alerts to its users whenever information is posted on Twitter that relates to topics set by Dataminr users. Users also have the ability to limit Twitter postings that relate to particular geographical areas, such as a specific city, county, or state.

The Resilient Mind: Growing Up and Working in the New Reality of Increased Violence

Michigan State Police

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

How do we emotionally prepare as professionals and parents for the new reality of increased violence in the United States? Our society has undergone significant change over the past few decades. With the increase of school violence and terror attacks, our primary and vicarious exposure to trauma has risen significantly. This session will address the psychological impacts of such traumatic experiences on those we care about, as well as ourselves. We will discuss practical measures in building resiliency at work and home. A panel of experts will provide relevant experience and knowledge which have been effective in the field. It is the goal of this workshop for attendees to take away strategies to develop a more resilient mindset for the people they lead and love.

Understanding the First Responder Role in Counterterrorism

National Counterterrorism Center, Joint Counterterrorism Assessment Team (JCAT)

Understanding the First Responder Role in Counterterrorism examines the critical and leading role that state, local, tribal, and territorial first responders now play in the US counterterrorism mission. This presentation explains how this role has evolved due to the nature of the CT threat currently facing our country and how SLTT first responders are now relied upon more than ever to be the front line in defending the Homeland from terrorist attacks.

Consumers Energy

Mass Shooting/Fatality Management in the Age of Active Shooter: What Should Healthcare and EMS be doing differently?

Division of Emergency Management

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference).

The presenter will draw on her experience assisting healthcare and EMS agencies nationwide to offer participants concrete ideas so healthcare organizations and EMS agencies can be better prepared to respond to a mass shooting or a mass fatality incident.

School Track: Stop the Silence. Help end the Violence. An OK2Say and Bullying Panel Discussion.

Michigan of State Police and Michigan Attorney General's Office

All students, school staff, parents, and community members have a critical role to play in observing, recognizing and responding to signs of youth high-risk behavior. Timely, effective interventions and ongoing prevention - in addressing bullying, suicide, self-injury, drugs, depression and anxiety - are critical components to student safety, well-being- and success. Learn how your school can utilize OK2SAY, a FREE student safety program.

Virtual Trends and Technology

Michigan State Police

Keeping up with the latest technology and security trends is difficult. Attendees will learn about new and popular technologies, how secure they are (or are not) and how to better protect yourself and your organization.

Public Health Consequences and Lessons Learned from the 2017 Mid-Michigan Flooding

Central Michigan District Health Department and Isabella County Emergency Management

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

Ms. DeRoche and Mr. Griffis will discuss the public health consequences to the 2017 Mid-Michigan flooding emergency, the response to the emergency and the lessons learned.

Venue Security

Illich Holdings

The Public Health Response to a Radiation Emergency and the Role of the National Alliance of Radiation Readiness (NARR)

Michigan Department of Health and Human Services

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

Radiation emergencies are often considered having a low-risk of occurrence, which typically results in minimal incident planning. However, should a radiation emergency occur, it will be critical to have plans in place in order to protect the public. The Michigan Department of Health and Human Services (MDHHS) is tasked with protecting human health during a radiation emergency. The MDHHS maintains the State of Michigan Potassium Iodide (KI) Program, which offers free KI to persons living and working within the 10 mile emergency planning zone of all three Michigan nuclear power plants. In addition, MDHHS has collaborated with the National Alliance for Radiation Readiness (NARR) to increase preparedness levels. The NARR is a coalition of public health, healthcare, and emergency management organizations.

Social Media Monitoring and Analysis – Tools to aid in public health emergencies

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

The presenter will speak on social media monitoring and analysis and offer tools that public health and healthcare officials can use to enhance emergency response and communication.

Regionalization of CIP Efforts

Department of Homeland Security

Unmanned Aerial Systems: A Threat Overview

Federal Bureau of Investigation

Unmanned aerial systems (UAS) for recreational and commercial purposes are becoming increasingly common in US airspace. Attendees at this session will learn about UAS capabilities and modifications, domestic and international UAS threat activity, notable UAS incidents and trends over the past two years, and FBI efforts to mitigate illicit UAS activity.

Hospital Surge from the US Virgin Islands to Georgia

Georgia Department of Health

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

The session will address the impacts of Hurricane Irma on the healthcare system of the US Virgin islands, the evacuation of patients to Georgia, and how the hospitals prepared for and responded to the surge in patients.

Terrorist Screening Center (TSC)

Terrorist Screening Center

The TSC emphasizes the importance of partnering with local, state, tribal, territorial, and federal law enforcement agencies to enhance officer safety and maximize our shared success in managing the Terrorist Watchlist and National Security Threats (Transnational Organized Crime Threat). This presentation includes topics such as: identifying and knowing when and how to respond to the TSC banner when a potential KST hit appears during any query of the National Crime Information Center (NCIC), understanding the importance of contacting the TSC's 24/7 Operations Center in order to enhance officer safety and confirm the identity of the KST, understanding the key role the law enforcement officer plays in collecting intelligence during the encounter and the potential value the information has in U.S. counterterrorism efforts, and identifying ways law enforcement partners can receive intelligence products from the TSC.

School Track: Pathways to Violence Workshop featuring A Revolutionary Act

Federal Bureau of Investigation

In the past few years, communities have felt the effects of violent extremism. The threat presents a unique challenge for law enforcement and our communities because extremists do not share a common profile, and may be self-radicalized, self-trained, and many believe violence is an acceptable solution to a perceived or actual grievance. Their experiences and motives are often distinct, increasingly unpredictable, and demonstrate a willingness to act alone – making them difficult to identify and stop.

Confronting Cyber Threats

Federal Bureau of Investigation

Integrating Persons with Disabilities into Emergency Preparedness and Response

Michigan Department of Health and Human Services

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

The presenter is a disabilities advocate who will speak on the importance of ensuring persons with disabilities are included in the public health and hospital emergency planning process. She will also provide participants with concrete ideas to help them achieve this in their organizations.

Suspicious Activity Reporting and Critical Infrastructure Protection in Michigan

Michigan Department of State Police

The presentation will be a step by step description of the Suspicious Activity Report(SAR) process for the MIOC and its impact on Critical Infrastructure Protection throughout the State of Michigan.

Autonomous Vehicles

Michigan Department of State Police

The future of Autonomous Vehicles is here. Learn what's down the road and what the future looks like for Michigan. Attendees will also learn about the different levels of autonomy, vehicle connectivity and vehicle-to-vehicle communications.

Integrating Prevention of Violent Extremism in Public Health Activities

University of Nebraska Public Policy Center

(This session is eligible for one nursing contact hour. In order to receive the certificate with your credit, please fill out the evaluation for this session following the end of the conference.)

The problem of violent extremism is often associated with homeland security and law enforcement; hence, most prevention and mitigation planning is done from that perspective. Yet, primary prevention is a core public health function. This presentation will focus on integrating the prevention of violent extremism into public health activities.

School Track: Reaching for Hope

Mother of Columbine Shooter

Following the Columbine High School tragedy of 1999, this mother worked to understand how her son could have become a perpetrator in a mass shooting. Guided by her own grief and trauma following the incident, her search for answers led her to understand the importance of early intervention and effective treatment for those who struggle with thoughts of suicide. As a passionate advocate for mental wellness, she shares a story of hope and determination to find solutions that prevent lethal thoughts from becoming lethal actions.

Sponsor Presentation: Verizon Wireless Business Continuity/Disaster Recovery Program

The Verizon Wireless Business Continuity/Disaster Recovery (BC/DR) program focuses on identifying potential risks, implementing preventative measures, and by developing and testing BC/DR plans to reduce the impact of a disruption. Verizon Wireless works to keep our wireless network the Nation's most reliable, so we're ready for any disaster that may affect our customers and communities, and know these ongoing preparations matter. The Verizon Wireless network has been tested time and again when disaster strikes – be it hurricanes, wildfires, tornados or other disasters affecting our communities. We understand the importance of wireless communication in disasters and prepare year-round, so customers can rely on our network to keep them, their families, friends and employees connected – even when the unexpected strikes. By building solid public / private partnerships with the emergency response community, Verizon Wireless becomes an integral part of planning, response and recovery efforts. The importance of these partnerships can never be overstated and we will continue our efforts, so that our partners know firsthand they can rely on us to keep them connected, as they respond to those who are affected by disaster.
